

**SUPPLEMENTAL REISSUE APPLICATION DECLARATION  
BY THE INVENTOR**

Docket Number (Optional)

03031/100G666-US2

I hereby declare that:

Each inventor's residence, mailing address and citizenship are stated below next to their name.

I believe the inventors named below to be the original and first inventor(s) of the subject matter which is described and claimed in patent number 6,568,123 B1, granted May 27, 2003 and for which a reissue patent is sought on the invention entitled

BLOOD-SUCKING INSECT CONTROL STATION

the specification of which

☐

is attached hereto.

☒was filed on March 16, 2004 as reissue application number 10/802,382and was amended on March 16, 2004, April 18, 2006 and August 7, 2006

(If applicable)

I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

☐

I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or (f), or 365(b). Attached is form PTO/SB/02B (or equivalent) listing the foreign applications.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

☐

by reason of a defective specification or drawing.

☒

by reason of the patentee claiming more or less than he had the right to claim in the patent.

☐

by reason of other errors.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

1. Original claim 1 of U.S. Patent No. 6,568,123 B1 recites, among other features, that a digital signal processor (DSP) be programmed with "an algorithm which generates" a prescribed analog signal. Original claim 9 recites, among other features, that a memory which stores a digitized audio sample be used in combination with a digital to analog converter (DAC) to output analog signals. The inventors had understood claim 1 as covering the preferred embodiment illustrated in Figure 7 and described in the subject reissue application. On March 2, 2004, the inventors brought to the attention of their patent attorney a data sheet concerning the integrated circuit used in the preferred embodiment. In discussion with patent counsel on March 5, 2004, the inventors became aware of a technical argument that could be made that claim 1 does not cover the preferred embodiment.
2. Accordingly, claim 48 has been presented for examination in the application for reissue by preliminary amendment which we have reviewed. Claim 48 specifies that there be an integrated circuit (IC) having a prescribed analog signal recorded therein. Claim 48 corrects the aforementioned error by reciting circuitry commensurate with the disclosure of the preferred embodiment.

(REISSUE APPLICATION DECLARATION BY THE INVENTOR, page 2)

Docket Number (Optional)  
03031/100G666-US2

3. Additional claims have been presented to correct the aforementioned error and more completely cover the subject matter of our invention.

All errors corrected in this reissue application arose without any deceptive intentions on the part of the applicants.

Note: To appoint a power of attorney, use form PTO/SB/81.
